From September 11 to 29, 2017, the Committee on the Rights of the Child (CRC Committee) held its 76th Session in Geneva.

The CRC Committee reviewed the progress of the implementation of the Convention on the Rights of the Child in 6 countries: Democratic People’s Republic of Korea, Denmark, Ecuador, Republic of Moldova, Tajikistan and Vanuatu. IBFAN submitted an alternative report on the situation of infant and young child feeding in Ecuador, and informed the Committee members about the main gaps related to the other reviewed countries, thanks to an active participation during the session.

Direct and Indirect Recommendations on Breastfeeding

In its Concluding Observations, the CRC Committee referred specifically to breastfeeding for 3 of the 6 countries under review (Moldova, Tajikistan and Vanuatu).

On a more general level and regarding data collection, the CRC Committee recommended that the collected data should cover all areas of the Convention and should be disaggregated by age, sex, disability, geographic location, and socioeconomic background. This recommendation was made to the 6 countries under review at the 76th Session.

Measures aimed at reducing child mortality rates were urged for 5 out of the 6 countries under review during this 76th Session. The Democratic People’s Republic of Korea was recommended to strengthen its efforts to address root causes of infant and child mortality; Ecuador was urged to tackle neonatal mortality, including actions to improve perinatal and postnatal health care for mothers and babies; the Republic of Moldova was alerted about the still high maternal and child mortality rates, especially at home due to preventable causes of death; Tajikistan was warned about the poor level of knowledge skills of health workers, linked with the rate of neonatal mortality and the poor quality of care at births; Vanuatu was recommended to take

1 Available in Spanish only
measures to reduce infant and under 5 mortality due to neonatal conditions and preventable diseases, such as pneumonia, malaria and diarrhea.

Additionally, the need for an independent monitoring mechanism on human rights was stressed in the CRC recommendations to 5 out of 6 countries: Democratic People’s Republic of Korea, Ecuador, Republic of Moldova, Tajikistan and Vanuatu.

**Breastfeeding Protection**

All the 6 countries under review were recommended by the CRC Committee to allocate adequate resources for children’s rights realization. Specifically referring to the health care system, Ecuador, the Republic of Moldova and the Democratic People’s Republic of Korea were recommended to provide for adequate training of health professionals.

The implementation of the *OHCHR Technical Guidance* on the application of a human rights-based approach to the implementation of policies and programmes to reduce and eliminate preventable mortality and morbidity of children under 5 years of age (*A/HRC/27/31*) was recommended by the CRC Committee to 3 countries under review: the Democratic People’s Republic of Korea, Tajikistan and Vanuatu. The OHCHR Technical Guidance makes direct reference to breastfeeding protection and support, and specifically calls for implementation and monitoring of the International Code of Marketing of Breast-milk Substitutes.

Furthermore, the CRC Committee addressed the topic of children’s rights and the business sector in its Concluding Observations to Ecuador, urging the State party to ensure effective implementation by companies of international and national environment and health standards, monitor the implementation of these standards and appropriately sanction and provide remedies when violations occur.

**Breastfeeding Promotion**

The CRC Committee recommended the Republic of Moldova to take measures to improve the practice of exclusive breastfeeding for the first six months, including through awareness-raising activities.

**Breastfeeding Support**

The *Baby-Friendly Hospitals Initiative* was mentioned by the CRC Committee in its recommendations to Vanuatu, as a programme that will encourage mothers to follow optimal infant and young child feeding recommendations. An adequate training of
health professionals about their responsibilities under the Convention was included in the recommendations to Ecuador and to the Democratic People’s Republic of Korea.
## CRC Committee’s Concluding Observations on Infant and Young Child Feeding

(4th to 5th periodic report) | no |

**Indirect – Allocation of resources (§9a,b,c):** Further increase budget allocations for the implementation of the rights recognized in the Convention, ensure a more balanced and equitable distribution of resources throughout the State party, including at the local level for social services; Utilize a child rights-oriented budgeting process, which specifies clear allocations to children in the relevant sectors and agencies, including specific indicators and a tracking system; Define strategic budgetary lines for all children, including those who may require social measures, and ensure their protection in times of financial crisis, especially with respect to health and education; **Data collection (§10a,b):** Expeditiously improve its data collection system, including establishing a centralized system covering all areas of the Convention, in particular with respect to vulnerable groups of children, including children living in poverty, children remaining behind whose parents have migrated abroad, children in street situations, Roma children, and children victims of sexual abuse and exploitation. The data should cover all areas of the Convention and be disaggregated by age, sex, disability, geographic location, ethnic and national origin, migration status and socioeconomic background; Ensure that the data and indicators are shared among the ministries concerned and used for the formulation, monitoring and evaluation of policies and programmes, and strengthen reporting compliance by all relevant ministries and institutions; **Independent monitoring (§11):** ensure the effective functioning of the Ombudsman for Children’s Rights, including with regard to its funding, mandate and immunities in full compliance with the Paris Principles, in particular with respect to receiving and investigating complaints made by or on behalf of children. The Committee also recommends that the respective roles and responsibilities of the People’s Advocate Office and the Ombudsman’s Office are clearly defined to effectively discharge their mandates. **Health and health services (§32a):** Continue to strengthen efforts to ensure access to quality health care, in particular perinatal health care and pediatric emergency health care services in all parts of the State party [..];

**Direct – Breastfeeding (§32e):** Continue to take measures to improve the practice of exclusive breastfeeding for the first six months, including through awareness-raising measures, providing information and training to relevant officials, particularly staff working in maternity units, and parents.

| 5 | Tajikistan  
(3rd to 5th periodic report) | no |

**Indirect – Allocation of resources (§8a):** Conduct a comprehensive assessment of the budgetary needs for children and allocate adequate resources, in accordance with article 4 of the Convention, for the implementation of children’s rights and, in particular, increase the budget allocated to social sectors and address disparities on the basis of indicators related to children’s rights; **Data collection (§9b):** Recommends that the data collected and generated from the State party’s Statistics Agency be disaggregated, inter alia, by age, sex, geographic location, ethnicity and socio-economic background and is effectively used to inform policy makers, and that efforts be made to increase the capacity of the governmental agencies to analyze the data; **Independent monitoring (§10a,b):** The Committee welcomes the establishment of a Commissioner for Children’s Rights in 2016, and, with regard to its general comment No. 2 (2002) on the role of independent human rights institutions, recommends that the State party: ensure its independence, including with regards to its funding, mandate and immunities; improve the efficiency of the Children’s Rights Department in the Office of the Commissioner for Human Rights to receive and investigate individual complaints directly from children, including by raising the awareness of the public, in particular children, of the existence of such mechanism.  

**Health and health services (§31,a,c):** Promptly take the necessary measures to increase the budget allocated to the health care system with a view to ensuring adequate access to primary health care services to all children, with particular attention to children in rural areas and from low-income families, including through implementation of the Strategic Plan for Further Reform of the Financing of Health Care (2015-2018) and through the introduction of compulsory health insurance coverage as foreseen by the Health Insurance Act (2008); Implement and apply the OHCHR Technical guidance on the application of a human rights-based approach to the implementation of policies and programmes to reduce and eliminate preventable mortality and morbidity of children under 5 years of age (A/HRC/27/31);  

**Direct – Nutrition (§33c):** Intensifying its awareness raising efforts about the importance of breastfeeding for infants and nutrition, in general, for children, among the general public and, particularly, caregivers of children.
